

Valdor Technology has

- A strong business plan and business model in fiber optics and streaming media. Both of these sectors are poised to be strong for at least several years and possibly several decades
- A strong, experienced and synergistic management team with proven ability to work together efficiently and effectively
- An excellent stock structure with long term investors dominating the investor base

Business Plan and Business Model

- A high technology company -- design and manufacture of fiber-optic & video streaming devices and components. Two divisions:
 - 1) **Valdor Fiber Optics**, Inc. in Hayward, California and
 - 2) **Niagara Streaming Media** in Dallas, Texas.
- Contract manufacturing in the USA and China
- Mandate -- solutions as opposed to products & partnership with clients.
- High quality, unique, harsh environment products with proprietary and/or patent protection.
- Focused on international sales.
- Organic growth & growth by acquisition. Raj Kapany M & A connections and experience.

Business Plan and Business Model Continued

- Acquisition targets must:
 - 1) Have synergy with the Valdor business plan and business model;
 - 2) Have synergy relative to management and/or customers and/or business sector;
 - 3) Be compelling for their value versus price;
 - 4) Have potential for international sales;
 - 5) Have a projected gross profit margin of about 60% and net profit margin of about 20%;
 - 6) Have a projected growth of at least 25%
- Fund acquisition via equity, debt & shares from treasury.

Management, Consultants & Board of Directors

- Accomplished and experienced management team and strong Board of Directors.
- Synergy.
- Key Management has invested significant amounts of their own money into Valdor. Management and Directors build their share position in lieu of cash. Management motivated to do what is best for Valdor.
